## PROFESSIONAL SUMMARY

Aspiring Artificial Intelligence and Data Science student with knowledge of Python, Java, SQL, HTML, CSS, and MySQL. Skilled in Python, Java, SQL, HTML, CSS, and MySQL, with strong problem-solving, teamwork, and communication skills.

## EDUCATION

|                                                          |           |
|----------------------------------------------------------|-----------|
| <b>B.Tech – Artificial Intelligence and Data Science</b> | 2023–2027 |
| CMS College of Engineering                               | CGPA: 7.5 |
| <b>Higher Secondary School</b>                           | 2022–2023 |
| Government Higher Secondary School                       | 78%       |
| <b>SSLC</b>                                              | 2019–2020 |
| Bedford Academy Matric Higher Secondary School           | 65%       |

## CORE SKILLS

- **Programming Languages:** Java, Python, SQL
- **Frontend:** HTML, CSS
- **Database:** MySQL
- **Concepts:** Object-Oriented Programming (OOP), Data Structures and Algorithms (DSA), DBMS
- **Tools:** VS Code, Git, Microsoft Office

## PROJECTS

### COLLEGE EVENT MANAGEMENT SYSTEM Python

- Developed a web-based application for managing college events including student registration, event management, attendance tracking, certificate generation, automated notifications, and report generation using MySQL.
- Designed a user-friendly interface for students and administrators to simplify event registration and event management.
- Implemented a MySQL database to securely store student, event, attendance, and certificate records.

### LUDO GAME Python

- Developed a multiplayer terminal-based Ludo game using Python with dice rolling, player movement, turn-based gameplay, and game logic using functions, loops, and the `random` module.
- Applied modular programming concepts to improve code readability, maintainability, and scalability.
- Implemented game rules including valid moves, winning conditions, and player turn validation.

### SNAKE GAME Python, OOPs

- Built an interactive Snake Game using Python and Pygame with keyboard controls, food generation, score tracking, snake growth, collision detection, and Game Over functionality.
- Optimized game performance using an efficient game loop and real-time event handling.
- Enhanced the user experience by displaying the live score and enabling automatic game restart after game over.

## CERTIFICATIONS

- Google Cyber Security Certification
- AI Driven Threat Indicator

## STRENGTHS

Problem Solver | Team Player | Adaptability | Decision-Making | Time Management

## AREA OF INTEREST

Artificial Intelligence | Machine Learning | Web Development | Cyber Security | Data Structures and Algorithms
